

**Unique, functional, user-Orientated.**

It`s all about creating new ideas that enhance the ride. This is where GUEE comes in....

Cycling accessories are just like the cheese topping on a pizza - a versatile ingredient that completes the flavor, a small yet vital part of the experience. Developed and tested by pro riders working closely with international teams, we aim to deliver convenience to our fellow cyclists with every product and idea.

We believe in functional, unique and user-orientated design for every ride.

# New Gripping Style

Handlebar tapes and grips add the finishing touches to your pride and joy, but they aren't just there for appearances. Often overlooked, these points of contact serve an important function, absorbing vibration and providing a grippy surface for your hands, increasing your control and, most importantly, making the ride more enjoyable.

At GUEE, we are proud to deliver the best possible products, protecting and improving riders with our innovations in handlebar tape and grip design.

# SL bar tape

Not just good looking but high functioning, SL handlebar tape is our premier lightweight, high durability series. The Microtex surface provides a breathable, comfortable and extremely grippy bar tape that is highly resistant to sweat and changes in climate. The patented triple layer design increases durability through the tensioned structure of its middle layer, while the high density cushion base disperses shocks, giving that extra degree of comfort.

### Lightweight

We know weight matters. Our bar tapes are designed to be as lightweight as possible, cutting bulk and keeping your bike light.

### Easy wrapping

You don't have to be a master craftsman to wrap our bartape. With just enough stretch, SL Series goes on with ease and stays on.

### Shock absorption

Our bar tape features a triple layer design that absorbs and disperses shocks on even the longest rides, keeping you in control from start to finish.

### Glove free

SL Series bar tape grips when you do. It doesn't rub and it doesn't pull the skin. Free your hands and leave your gloves at home today.

## SL GEO

- Geometrically patterned colors to match your kit theme.
- Premier lock-tight end plug. Stable and secure.

### SPECIFICATIONS

- Material: Polyurethane/ EVA
- Dimension: 2150mm (L) x 30mm (W) x 3mm (T)

# Silicone bar tape & grip

Our Silicone bar tapes & grips are made from medical grade silicone, which has its advantages over more traditional coverings. The material's natural tenacity means it's highly dependable in the wet and requires no backing adhesive, enabling effortless unwinding for cable replacement, bar swaps or aesthetic perfection.

Made with special production process to create max shock absorption and grip. Designed with one edge thicker for absorbing shock and vibration with the opposite edge thinner for better steering.

### Water resistant

Silicone's innate water resistance repels sweat and water, keeping it away from the handlebar and increasing product life.

### Washable

No one likes dirty bar tape. GUEE silicone products are washable, making them much easier to keep clean than traditional tape. Cyclists, no need to be afraid of using white bartape or grips any more!

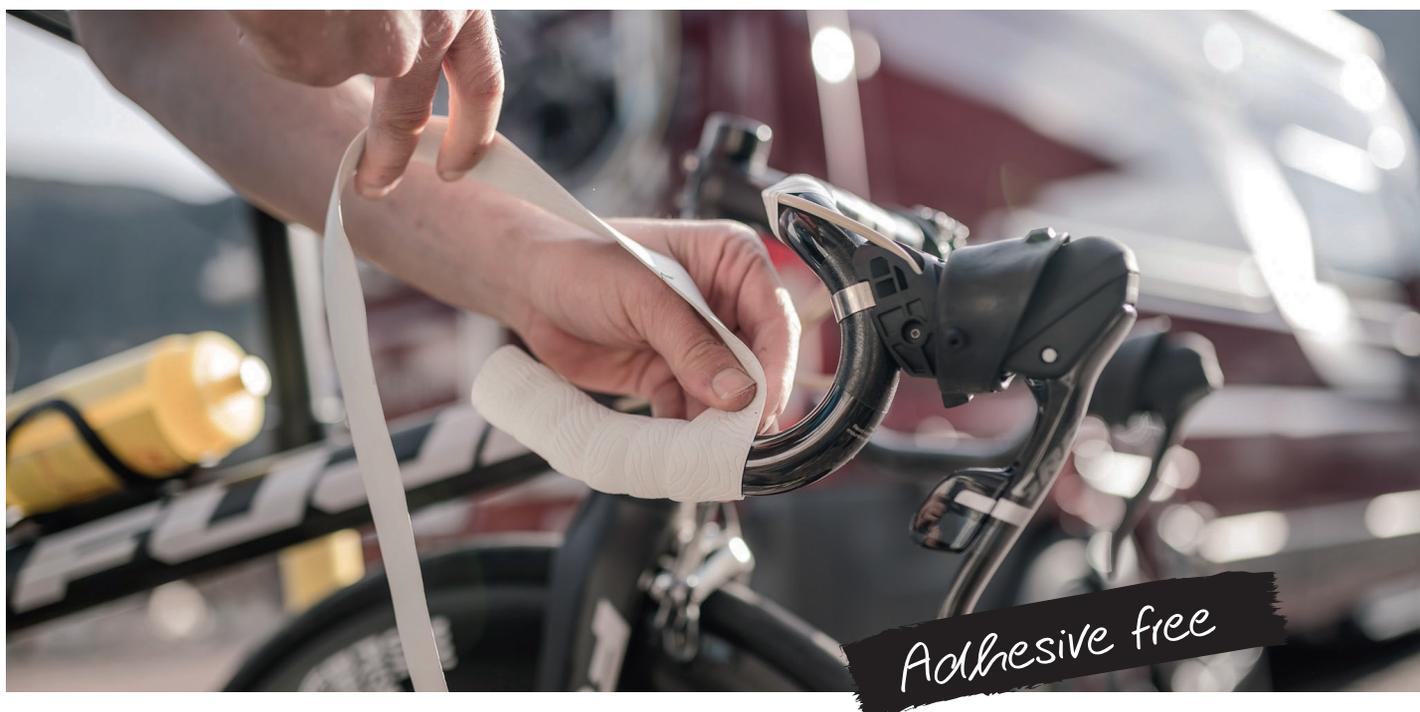

### Shock absorption

Engineered with our special foaming process, GUEE silicone products offer comfort and great shock absorption over the longest of rides.

### Anti-UV

Our silicone products are UV and heat resistant, making them incredibly long lasting. Enjoy that sun!

## SIO / SIO DURA

### Re-wrappable

GUEE silicone bar tape is tacky in nature, allowing it to be re-wrapped multiple times without leaving any adhesive on the handlebar.

### SIO

# Beam Lights

Night cycling is about seeing and being seen. Riders need focused light to see obstacles ahead, yet also need a wide field of illumination to be seen from a variety of angles. Theta and G-One feature our solution to this conundrum: dual beam technology.. A focused beam is projected out from the front wheel, while floodlighting is distributed in a wide arc directly in front of the bike, illuminating the immediate surroundings.

## Theta / Theta-K

- The beam design meets German road standard.
- Cut-off line beam design to avoid dazzling oncoming traffic and for better visibility & safety.
- The beam includes
  - > Focused light from the front wheel out to 10 meters.
  - > Flooding light distributed in a wide arc in front of the wheel, illuminating road conditions.
- Built-in auto light sensor (Smart Ambient Sensor) for auto brightness control.
- Power indicator shown in 4 levels allowing immediate identification of power status.
- Built-in rechargeable battery easy to charge by USB cord.

### SPECIFICATIONS

- Modes: Automatic & Manual (High/ low)
- Light: CREE hi-power LED
- Battery: 3.7V Li-Polymer rechargeable battery (1000mAh)

Speed sensor automatically  
signals to vehicles behind!

**Aero-X** is a bicycle tail light designed to ensure you're seen both day and night. The light features a clever, power-saving feature that extends the run time, turning itself off after idling for 60 seconds, with auto-reactivation when you start riding again.

*Power Saving* 

## AERO-X

**SPEED  
SENSOR**

**AERO  
ROUND**

**USB**

**IPX5**

- Auto speed sensing: the light gets brighter as a signal to riders or cars behind.
- Power saving technology for run time extension.
- Wide angle lens for visibility to the rear, left & right sides.
- Fits with both aero dynamic (e.g. Venge, Propel, S5) and round seat posts.
- Compact & tool-free mounting system.

### SPECIFICATIONS

- Modes: Flash/ strobe/ constant
- Battery: Li-Poly rechargeable (500 mAh)
- Charge: Micro USB supply 5V
- Charge Time (approx): 2.5 hours
- Run Time(approx):  
50hrs (flash) / 20hrs (strobe) / 8hrs (constant)
- Mount Size: 27.2mm - 35mm Round tube  
Any aero tube under 14cm diameter

Pr. No. GU-LT07-R1A1

Aero-X's motion-sensing technology kicks in automatically, doubling the brightness when you're slowing down or riding in rough terrain.

## Adjustable Wing

Featuring a versatile, adjustable wing design, the Aero series easily mounts on round or aero seat posts - a great improvement for road safety.

## AERO-XK

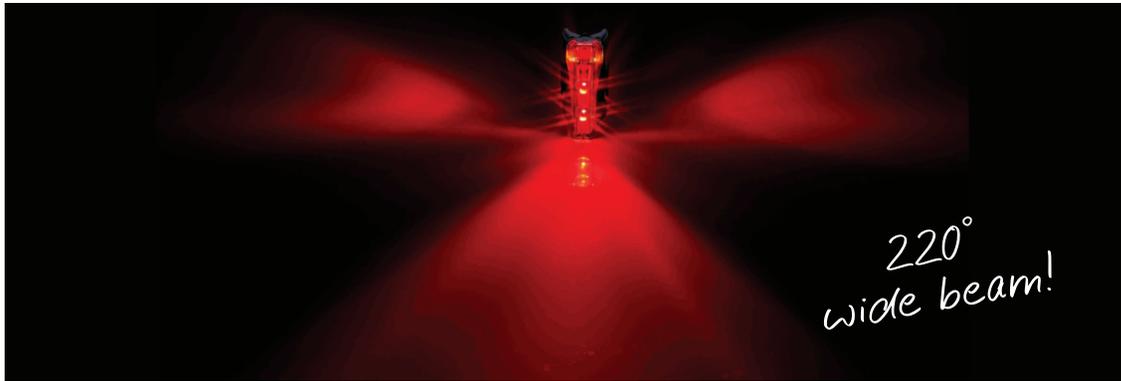

- 220° wide beam
- Meets German road standard

### SPECIFICATIONS

- Modes: Constant none flash
- Battery: 3.7V Li-Polymer rechargeable battery (500mAh)
- Charge: Micro USB power supply 5V
- Charge time (approx): 2.5 hours

### Click & Go

is a unique mounting system that offers the seamless integration of your smartphone into your fitness regimen, allowing easy attachment to GUEE bike mount solutions when cycling or an armband when jogging, running or at the gym.

### The GUEE Click & Go WP Phone Case packs a host of user-orientated features.

#### Universal size

The GUEE WP Phone Case can be used with most smart phones. Whatever the shape of your phone, the internal elastic straps will keep it stable during rough activity.

#### Water resistant

With a seamless tarpaulin construction, the WP Phone Case is not only incredibly resilient to wear and tear, but keeps mud, rain and sweat at bay in the worst of conditions.

#### Camera window

What good is a ride if you don't go somewhere nice? The transparent rear window lets you snap a quick pic without taking the phone from the case.

#### Money pocket

The interior money pocket keeps notes and credit cards well hidden - no need to bring your wallet!

## WP Phone Case + i-Mount

\* Phone & Camera is not included

- An integrated solution for smartphones and sports cameras to free your handlebar from clutter.
- 15° adjustability for optimal viewing angle.
- The universal mounting system allows the best viewing angle and horizontal positioning.
- Water resistant phone case. Avoid mud, rain and sweat damage.
- Interior elastic straps keep the phone secure during riding.
- Hidden money pocket for credit cards or notes.
- Flexible, with easy headphone jack access.
- Compatible with GUEE sports armband (optional) for use during other sports.

### WP Phone Case Kit (For i-Mount & G-Mount)

WP Phone case with an adapter for i-Mount & G-Mount.

WP Phone Case (L) with adapter for i-Mount & G-Mount	Pr. No.GU-BG01-G2A2
WP Phone Case (S) with adapter for i-Mount & G-Mount	Pr. No.GU-BG01-G1A2

# Cages

Whether you're into mountain biking, you use your folding bike for a commute or you rely on your hybrid to get from point A to B, a decent bottle cage is ideal for keeping your drink in a safe and secure place.

## Qing/ Qing+

With a unique design and edgy graphics, the Qing & Qing+ bottle cages are ideal for any bike but are especially suited to frames with sloping top tubes and shallow front triangles.

Made of high strength-to-weight CFR Nylon, Qing is light, tough and affordable. At 18g, you won't even notice it's there.

Qing+ offers an integrated bottle cage and tyre lever solution. Whether thirsty or suffering a flat, you have a frustration free problem solver for unexpected occasions.

### SPECIFICATIONS

- Material: Carbon/Nylon Composite
- Size (L x D x H): 85\*79\*148mm
- Weight: Qing 18g (w/o bolt) / Qing+ 25g (w/o bolt)

Qing (without tyre lever; stainless bolt)  
Qing+ (tyre lever included; aluminum bolt)  
Tyre lever set (2pcs)
