CYCLON[®]
KEEP YOUR BIKE SMILING

HIGH QUALITY FOR BICYCLES

All Cyclon products are created out of true passion for cycling. 30 Years ago the founder of Cyclon, Leen Boers, developed our first high quality chain lube. Over the years we developed a complete range of Cleaning, Lubrication, Protection and Maintenance product especially for the high-end user. And we are never finished! Improving our existing products and developing new ones is our daily business. We do everything to keep your bike smiling.

So if you are a true fanatic cyclist or just somebody that only wants the best for his bike we've got it for you!

We now offer complete kits specially combined for Cleaning, Lubricating, Protecting and Maintenance work. Or you can choose a kit with all products you need for your type of bike. We have kits available for Race, MTB and E-bikes.

Please enjoy our product catalogue and feel free to contact us or your local distributor if you have any question.

Cleaning

Lubrication

Protection

Maintenance

Cleaning Keep your bike clean with our complete range of cleaning products. Remove all the dirt and oil easily from your chain and sprockets with our biodegradable Bionet cleaner. Keep your bike shining as new with our Bike cleaner. Find out at this page what more high quality products we have to keep your bike smiling.

CLEANING

► Watch our instruction videos
www.cyclon.nl/videocleaning

BIONET

A biodegradable degreaser for removing oil, grease, polish and wax.

Product Application

Cleaning of the chain, cassette and crankset.

Product Characteristics

Biodegradable and can be diluted with water.

Non-flammable and non-toxic.

Suitable for all synthetic materials and metals of the bike.

Packaging

250ml/750ml trigger spray, 1ltr bottle, 5ltr/20 ltr can.

BIKE CLEANER

A biodegradable Bike Cleaner for cleaning all the bikeparts.

Product Application

Cleaning of persistent dirt like mud, oil and other daily dirt.

Product Characteristics

Biodegradable and PH-neutral.

Non-flammable and non-toxic with a pleasant smell.

Suitable for matt, varnished, unvarnished and synthetic material

Packaging

250ml/750ml trigger spray, 5ltr/20ltr can.

BRAKE CLEANER

A fast drying cleaner for removing grease and dirt on moving metal surfaces.

Product Application

Cleaning of the caliper, discs and derailleur. Also suitable for assembling handlebars and bikeparts.

Product Characteristics

Fast drying cleaner.

Solutes dirt fast.

It doesn't leave any residue.

Packaging

100ml/250ml/500ml aerosol.

CLEANING

FOAM CLEANER

A foam cleaner which cleans different materials without stripes.

Product Application

Stripeless cleaning of varnish, glass, synthetic material and metals.
Cleans things like the frame, helmet, handlebar tape and dirt.

Product Characteristics

The foam bonds with the dirt and it all disappears.

Easily removes insects and scale.

Soluble in water and biodegradable.

Packaging

100ml/250ml aerosol.

MATT CLEANER

A biodegradable degreaser for removing oil, grease, polish and wax.

Product Application

Cleanes the bike and the bikeparts without the use of water.
For varnished and unvarnished materials.

Product Characteristics

Very good for using against light pollution.

Also removes residue of sport nutrition.

Matt stays Matt after cleaning.

Packaging

100ml/250ml/500ml aerosol.

CLEANING KIT

Keep it clean with our cleaning kit. Remove all the dirt of your bike with our biodegradable Bike Cleaner. Make your chain and sprockets spotless clean with BioNet. Improve your brake power with Brake Cleaner Spray. Use our Foam Spray to clean your helmet. Together with the included accessories you will only need water!

Contains: BioNet Trigger – 750ml / Brake Cleaner Spray – 250ml / Bike Cleaner Trigger – 750ml / Foam Spray – 250ml / Sponge / Towel / Brushset / Handgloves

CYCLON®
KEEP YOUR BIKE SMILING

Lubrication Only the best lubrication keeps your bike going for years. Cyclon offers a wide range of high quality lubes. Use our Course Lube to keep your racebike in top condition. More a MTB rider? Use our Wet Lube to keep your chain running smooth in dirty and wet conditions. We have a complete range of lubes for all kind of bikes and for every weather condition. Find out at this page.

LUBRICATION

▶ Watch our instruction videos
www.cyclon.nl/videolubrication

DRY LUBE

Excellent lubricant for the chain, derailleur, shiftsystem and cables. It does not attracts any dirt or dust.

Product Application

Lubricates the chain and other moving bikeparts. For dry weather conditions.

Product Characteristics

Dry lubrication so that no dirt or dust attaches.

Expels moisture and it protects against corrosion.

Reduces friction and increases the durability of all moving parts.

Packaging

25ml/125ml dripper, 750ml/5ltr can.

Lubrication

COURSE LUBE / COURSE SPRAY

Lubricant with PTFE for chains, derailleurs, discsystems and cables. For changing weather circumstances.

Product Application

Lubricates the chain and other moving bikeparts. Is waterresistant and gives long-lasting lubrication.

Product Characteristics

Takes care of flexible shifting and reduces noise.

Expels moisture and protects against corrosion.

Contains PTFE for a long-lasting protection and reduces wear.

Packaging

25ml/125ml flacon, 750ml/5ltr can, 100ml/250ml/500ml aerosol.

WET LUBE / WET SPRAY

Strong penetrating lubricant with a long-lasting effect. For chains who will be exposed to extreme (weather) conditions.

Product Application

Lubricating and protection of the chain from MTB's, Go-karts and scooters.

Product Characteristics

Can deal with high pressure.

Easy shifting also when the chain is very dirty.

Very suitable for wet weather conditions. (contains PTFE)

Packaging

25ml/125ml dripper, 750ml/5ltr can, 250ml/500ml aerosol.

LUBRICATION

WAX LUBE

Wax chain lubricant with added additives for a dry and clean chain.

Product Application

Lubricating chains for all the weather conditions.
For long-lasting lubrication and reduces wear.

Product Characteristics

A lubricant consisting wax. It doesn't attract dirt.

With biodegradable additives.

Contains PTFE for long-lasting protection and reduces wear.

Packaging

25ml/125ml dripper, 750ml/5ltr can.

EASY GO, OUR TAKEOUT DRIPPERS

Dry Lube - 25ml dripper
Course Lube - 25ml dripper
Wax Lube - 25ml dripper

LUBRICATION KIT

The kit! With all the lubricants you need for all different weather types. Use Course Lube for your chain and sprockets in normal weather conditions. Our Dry Lube is ideal for dry weather conditions, dust has no chance on your chain. With our Wet Lube it doesn't matter how hard it rains, it keeps your chain protected. And our latest invention is Wax Lube! No oil just wax for long lasting protection and lubrication without attracting dirt.

Contains: Dry Lube – 125ml / Course Lube – 125ml / Wet Lube – 125ml / Wax Lube – 125ml

Lubrication

CYCLON[®]
KEEP YOUR BIKE SMILING

Protection Protect your complete bike against all kind of dirt with our protection products. Polish your varnish like a shining mirror with our Condit polish oil. Make your complete bike dirt resistant with our Instant Polish Wax. Cyclon offers protection products for every part of your bike. Check all products at this page.

PROTECTION

▶ Watch our instruction videos
www.cyclon.nl/videoprotection

INSTANT POLISH WAX

Protects the varnish, metal and synthetic parts of the bicycle it brings back the original shine. Also for matt varnishes!

Product Application

Gives parts and the frame a dirt-repellent coating and gives the varnish, metal and synthetic material a temporary protection.

Product Characteristics

Transparant protecting wax.

Nice and fresh odour.

Strong water resistant and prevents the attachment of dirt.

Packaging

100ml/250ml/500 ml aerosol.

Protection

CYLICON SPRAY

A high-end siliconspray which can be used for different purposes.

Product Application

This spray protects the bike and bikeparts against dirt. It offers protection to suspensionsystems.

Product Characteristics

- Expels moisture and has light lubricating characteristics.
- Is dirt resistant.
- Suitable for all synthetic material and metals.

Packaging

250ml/500ml aerosol.

VASELINE SPRAY

Prevents oxidation of the rim, spoke, lock and chrome parts of bicycle.

Product Application

Prevents oxidation. Conserves the components by a acid-free film at the material.

Product Characteristics

- Protects parts against weather and pollution.
- Is water repellent.
- Protects against oxidation.

Packaging

250ml aerosol.

PROTECTION

POLISH OIL

For polishing the coated and metal parts of a bicycle.

Product Application

Polishing and conserving the varnish and the metal parts and brings back the original look and feel.

Product Characteristics

Liquefies well.

Cleans greasy and dirty surfaces.

Easy to apply with the dripper.

Packaging

125ml dripper, 750ml/5ltr can.

CONDIT

An extremely fast and effectively applicable polish with wax. Restore the layer of varnish.

Product Application

Condit is really fast and effective to use with wax, it doesn't matter which varnish layer you recondition.

Product Characteristics

Contains an abrasive for removing the old varnish layer.

Gives a protecting wax layer.

Contains PTFE.

Packaging

125ml dripper, 750ml/5ltr can.

TYRE REPAIR GEL

Gel to repair holes in tyres that are not larger than 2mm.

Product Application

Repair innertubes, tubeless tyres and tubes with holes that are not larger than 2 mm. Also suitable for E-Bikes.

Product Characteristics

Easy to dose.

Easy managable.

Long preservability.

Packaging

75ml aerosol.

PROTECTION KIT

Protect your bike against all the dirt during your ride. Easily restore your varnish with Condit Polish. Make it shine again in a view of seconds. Instant Polish Wax makes it hard for dirt to attach to your bike. Protect all unpainted metal parts and synthetic material parts with Cylicon Spray. Use our Vaseline Spray to protect unpainted metal parts against hard conditions during winter time. Whenever you have a flat tyre the Tyre Repair Spray gets you home save.

Contains: Instant Polish Wax – 250ml /Condit – 125ml /Cylicon Spray – 250ml / Vaseline Spray – 250ml /Tyre Repair Spray – 75ml

CYCLON®
KEEP YOUR BIKE SMILING

Maintenance If you are a true bike enthusiastic or a professional mecanicien we have all products to grease and lube every special part during (re)assembly of your bike. Keep every carbon part fixed in the right place with our Stay Fixed Carbon. Easily (re)assemble all bike components with our Assembly Paste. Check out all our maintenance products at this page.

MAINTENANCE

5X1 SPRAY

Applies a thin layer of PTFE and so it guarantees a long lasting lubrication. Excellent lubrication for extreme conditions.

Product Application

For extreme weather conditions and suitable for all rotating parts of a bicycle.

Product Characteristics

Reduces wear and prevents stick-slip.

Large spray aerosol for the workshop.

Contains PTFE.

Packaging

500ml aerosol.

Maintenance

CHAIN GREASE SPRAY

A strong, grease based PTFE lubricant. Long lasting effect at heavy loaded chains.

Product Application

For the chain, smooth surfaces, ball bearings and connections. Offers an excellent lubrication for exceptional conditions.

Product Characteristics

Is not sticky and reduces friction. (Contains PTFE).

Long lasting and resistant against salt and fresh water.

Does not effect rubber and synthetic material.

Packaging

500ml aerosol.

COURSE GREASE

Strongly adhesive grease with excellent water resistance, anti-wear and anti-corrosion characteristics.

Product Application

Grease developed especially for long-lasting lubrication of hub bearings, the seatpost and the headset.

Product Characteristics

Reduces rolling resistance.

Resistant against salt and fresh water.

Does not effect rubber and synthetic material.

Packaging

150ml tube, 500ml/1000ml jar.

MAINTENANCE

MTB GREASE

Very strongly adhesive grease with long lasting effect in extreme weather conditions.

Product Application

MTB Grease is very suitable for the lubrication of bearings and hups of MTB and Cycle Cross bicycles.

Product Characteristics

Very low rolling resistance.

Does not saponify and strong water resistant.

Protects against corrosion.

Packaging

150ml tube, 500ml/1000ml jar.

STAY FIXED

Carbon assembly grease suitable for all types of saddle pins, handlebars and stems.

Product Application

Use for the assembling of all fixed parts like the carbon saddle pin, handlebar and stem.

Product Characteristics

Prevent cracking of saddle pins, handlebars and stems.

Prevents movement of the assembled parts.

Simplifies assembling and disassembling of parts.

Packaging

150ml tube, 500ml/1000ml jar.

ASSEMBLY PASTE

Paste to assemble or disassemble fixed components subjected to extreme and variable conditions.

Product Application

Use for the (dis)assembling of all fixed parts subject to extreme load and resistance against moistly conditions.

Product Characteristics

Long-term resistance against corrosion.

Repairs slightly damaged threads.

Doesn't contain heavy metals. (Ecological).

Packaging

150ml tube, 500ml/1000ml jar.

BEARING GREASE

Bearing grease with excellent water resistance characteristics.

Product Application

General grease for city bikes. Developed for all ball bearings, hubs, axles and haddlebarplungers.

Product Characteristics

Excellent lubrication for city bikes.

Procures excellent rolling resistance.

Packaging

150ml tube, 1000ml jar.

SUSPENSION GREASE

Grease for hydraulic systems of bicycles and motorized two-wheel vehicles.

Product Application

For all suspension systems including fork, rear suspension and seat posts.

Product Characteristics

Protects all synthetic material moving parts and seals.

Increases durability of all moving parts.

Very effective moisture repellent and dirt-resistant.

Packaging

500ml/1000ml jar.

SPEED HUB GREASE

High-quality lubricant for speed hubs.

Product Application

Suitable for most common sold speed hubs like Shimano, Sram and Nuvinci.

Product Characteristics

Optimal lubrication of all moving parts in speed hubs.

Developed for a smoother and faster shifting.

Increases the durability of the speed hub.

Packaging

500ml/1000ml jar.

MAINTENANCE

PENETRATING OIL LUBE / SPRAY

Loosening rusted connections and applies a protecting layer.
Oil is light transparent.

Product Application

Loosening rusted treaded connections of pedals, crews and other parts with screw-thread.

Product Characteristics

Optimal penetration.

Removes rust formation.

Protects against mosting.

Packaging

125ml dripper, 750ml can, 250ml aerosol.

FORK OIL 5W OR 10W

High quality forks oil based on carefully selected premium oils and additives.

Product Application

For use in bicycle forks or dampers. Viscosity depends on the desired damper effect and conditions of use.

Product Characteristics

Excellent fluidity at all temperatures.

Protects from wear and corrosion.

No foam production.

Packaging

125ml dripper, 750ml can; in 5w or 10w.

BRAKE FLUID MINERAL OR DOT5.1

Hydraulic brake fluid that can be used in all hydraulic brake systems for bicycles and motors.

Product Application

For hydraulic brake systems, DOT5.1 is mixable with other synthetic brake fluids. It doesn't mix with mineral oils.

Product Characteristics

Strong resistance against corrosion.

High viscosity, also at low temperatures.

Very high frictional resistance.

Packaging

125ml dripper, 750ml can, available in DOT5.1 & Mineral.

MAINTENANCE KIT

After all those long great rides your bike deserves good maintenance. With our maintenance kit you have everything to easily (re)assemble all the parts on your bike.

Contains: Course Grease – 150ml / MTB Grease – 150ml / Stay Fixed – 150ml / Assembly Paste – 150ml / Fork Oil 5W or 10W – 125ml / Brake Fluid Mineral or Dot4 – 125ml / Penetration Spray – 250ml / Tyre Assembly Spray – 100ml
