

# Daiya 550ml Pro team bidons

## The Choice of Champions

### World Tour teams find their way to sustainability

The official pro team water bottle is the Daiya O2, made from Biobased material derived from sugarcane. From the residual sugarcane material, we process polyethylene that is used for our bottles. This process is much cleaner than the conventional methods and has a nice added benefit: as the sugarcane grows, it removes CO2 from the air.

This bottle is the favorite among the professional cyclists of our partner teams.

All bottles and bottle cages are produced in our own factory in the Netherlands, allowing us to control and guarantee quality. For the best grip, we always recommend combining a Tacx bottle with a Tacx bottle cage.

**Don't miss this opportunity to benefit from these sought-after eye-catchers!**

**Available in boxes of 50 or 25 pieces per design.**

# Daiya 02 (Sugarcane / Biobased)

## Specifications

02 - Sugercane/Biobased	
Height	196 mm
Weight	80 g
Diameter	77 mm
Lower Print area	235,5 x 100 mm
Material	PE   PP   EVA Copolymer   Eco Pure
Dishwasher safe	Max. 65 degrees, bottle and print
HS Code	3924100090
Country of Origin	The Netherlands
Brand	Tacx/Garmin
BPA Free	Yes
100% recyclable	Yes
Type of ink	Low migration ink
Print technique	Silk screen printing
Usable life-span	3-5 years
Test reports / Certificates available	Yes
Product Packaging	Outer carton (Triman)
Sedex Membership	S4166005
SMETA 4-Pillar	Yes
