OUR MISSION

Since 1993, Lizard Skins has created products to meet the needs and wants of all cyclists. Specializing in grip, glove and protective accessories, Lizard Skins has become a global brand in the cycling industry. After 25 years, Lizard Skins now enjoys customers through its distribution channels in over 80 countries. Athlete sponsorships in cycling's top competitions has brought with it a pedigree of victories for which we are very proud. Input from the world's top riders and our passionate employees has allowed us to expand our products to all facets of cycling. Our team of cyclists can be found on the road or trail daily, putting our mission to the test: Protect the bike and rider while making the ride more enjoyable.

NEW TO DSP BAR TAPE

The best bar tape in the world just got better!

PATTERN

The best-selling pattern is now more technical with an updated design and multiple layers of depth. Realize the epitome of grip and control with the most advanced bar tape.

POLYMER

Balance between comfort and durability is the key to optimum performance on any ride. The updated polymer is that. Ride longer with our most durable and comfortable DSP ever created.

SCREW-IN PLUG

Have a clean, tight finish to the DSP Bar Tape with the new screw-in plug.

1.8 MILLIMETER

Realize the epitome of grip and control with our thinnest bar tape. Minimal padding allows for maximum feel and handling while carving the corners of your local criterium.

2.5 MILLIMETER

Balance is the key to optimum performance in a stage race. Experience the perfect blend of grip and comfort that teams AG2R La Mondiale Pro Cycling Team, Lotto Soudal and Movistar Team use to win in the pro peloton.

3.2 MILLIMETER

Our thickest bar tape is ideal for your next double century, gravel grinder or cyclocross race. Discover why our Pro Tour teams spec this tape for the Spring Classics.

THIS GRIP, ALONE AND/OR IN COMBINATION WITH A HANDLE, MAY BE COVERED BY ONE OR MORE OF THE FOLLOWING US PATENTS: 5,374,059; 5,645,501; 5,695,418; 5,730,669; 5,797,813; 5,857,929; 5,890,972; 6,203,308; 6,244,975; 6,641,488; 6,676,534; 6,733,401; 6,815,028; and 7,195,568. Other US applications and foreign patents and applications pending.
